Army Creek Landfill Sampling and Analysis

December 15, 1978

Albert Montague, Director
Office of Research & Development (3RD00)

Bob Mitkus, Director
Surveillance & Analysis Division (3SA00)

Please find attached a memo to me from Water Supply Branch requesting continuation of the sampling and analysis program begun some time ago. As coordinator of this project, I feel the effort is necessary to continue and further our understanding of the problems associated with this landfill.

Would like to meet with you to discuss this further if you wish.
